

315W CDL Agro - Suggested lighting layout for 4 feet x 8 feet grow beds

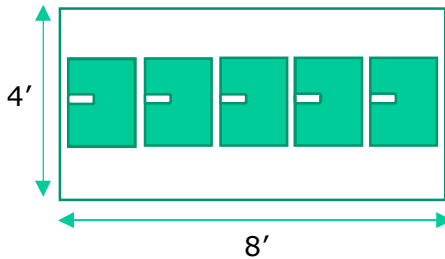

OPTION A

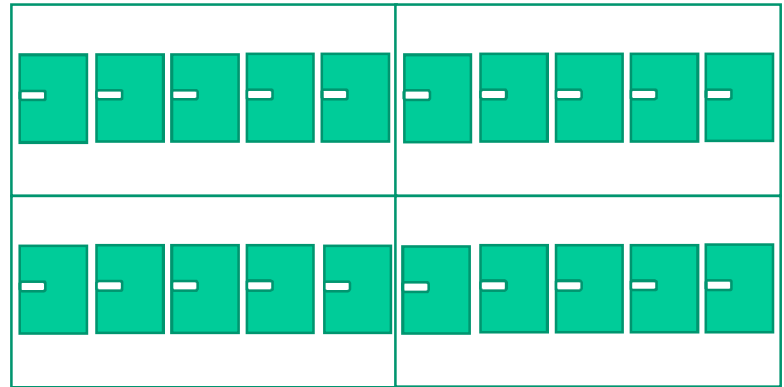

4x315W CDL replace 2x1000W HPS
Equal yield, energy savings >48%

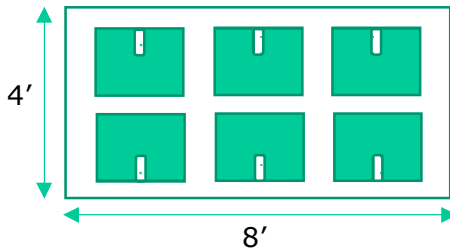

OPTION B

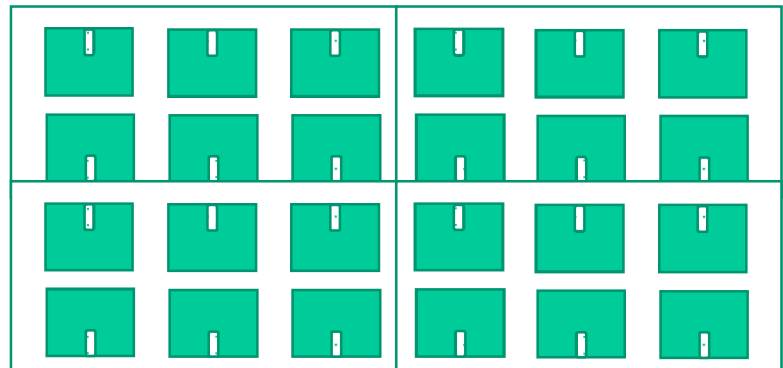

5x315W CDL replace 2x1000W HPS
40% more yield, energy savings >27%

OPTION C

6x315W CDL replace 2x1000W HPS
70% more yield, energy savings >7%

Notes:

1. Up to 8 lights per 20A/240V may be daisy chained.
2. For optimum results in flowering cycle, bottom of lights should be no more than 12 inches away from plants.
